The Bocca Tigris Fortification Headquarters dispatched Russian technicians to install a radar station at Shachiao (沙角), Bocca Tigris (Humen). Tests have been completed. At the station there are instruments which look like an "Angle Finder" with a 'longitude and latitude' apparatus attached, and a 'Range Finder'. There has also been a radio installed with a very strong (high) frequency and the 'Electric Recurrent' device. The station is generally well guarded by Russians, and, without a special permit, no one is allowed to come near the place.

Comment. This information appears very garbled. The station sounds like a radar set with a predictor electronically connected, but there is no mention of any anti-aircraft weapon.
